Examiner, Art Unit 3616

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art does not specifically teach or disclose in addition to the other limitations of the claim that the safety device operation control unit is constructed so that, when the distance between the vehicle and the object enters a predetermined range based on the correlation calculated by the correlation calculating unit, the automatic brake unit causes generation of a deceleration to a degree, which is capable of allowing the occupant to recognize that a braking force has been generated, and at the same time, the seatbelt device alternates between tightening and releasing of the seatbelt. The applicant should note among other things that according to the combination applied by the foreign patent office communication and from the knowledge that can be obtained from the cited foreign language art, only an irreversible seat belt arrangement appears to be fairly taught by the cited combination, not one that alternates in the manner claimed.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOSEPH ROCCA whose telephone number is (571)272-5191. The examiner can normally be reached on 8:30 AM to 5:00 PM, Monday through Friday.
